

Investigative Advisory Services

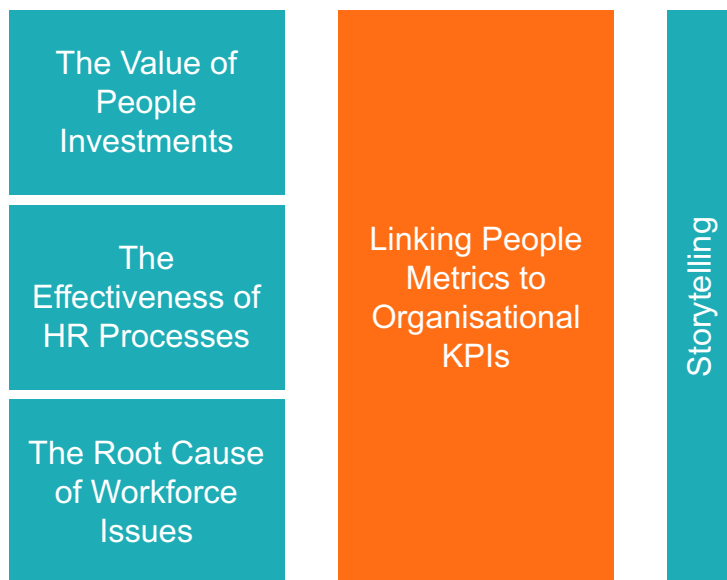

Our primary focus is to provide the structure, methodologies and coaching that enable others to generate people insight.

However, we also conduct discrete investigations on behalf of our clients.

Our Services:

These investigations typically fall into broad categories:

- Evaluating and maximising the value of investments in people (measuring the effectiveness of HR processes and determining the root cause of current and emerging workforce issues)
- Then linking the resultant people metrics to organisational priorities and KPIs, and crafting cogent stories that inform decision making
